

## Knitted Flat Circle

I searched high and low for a pattern to knit a flat circle. After going into my local knitting store and being told to knit wedges I decided I needed to figure this out on my own. I needed a circle, not a hexagon. I like the wedge design for many things but I don't like the points it makes around the edges. So I played and played and here it finally is!

The circle can be bigger or smaller by casting on more or less. Simply change each number in accordance to your original cast on number. Be sure its an even number and note that the original cast on creates your diameter!

Cast on 10 sts - using the long tail method (more or less for bigger or smaller circles) this creates the diameter of the circle) Abbreviations:

K: Knit

w&t: wrap and

turn

\*K2, w&t and knit back

K4, w&t and knit back

K6, w&t and knit back

K8, w&t and knit back

K6, w&t and knit back

K4, w&t and knit back\*

Repeat from \* 4 more times.

K6, w&t and knit back

K8, w&t and knit back

K6, w&t and knit back

K4, w&t and knit back\*

Repeat from \* 4 more times.

K10

Bind off leaving long enough tail to sew up seam.

Using a tapestry or yarn needle, use the tail from the last stitch to stitch down to the center to close it.

That's it, it's a perfect circle!!!
